

Duo Line Wood

Duoline is characterized by the classic shape of aluminum edges, typical for modern constructions and the latest trends in architecture. The possibility to select pine or mahogany profile and a thickness of 68mm 78mm or 88mm offer excellent opportunities to create various technical solutions.

available in wide color palette
of all RAL colors :

- 2" glazing pocket
- Wood profile made of pine or meranti wood, laminated with 3 or 4 layers
- Aluminium covers - resistant to weather conditions.
